DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose nor reasonably suggest the receiver/decoder of claims 8, 15, method of 17, remote controller of 23, which include a first means for interacting with a user's credit or bank card to read information on the card, a second means separate from the first means to interact with a user's smart card to read information on the smart card which is modifiable remotely by a remote centre in response to a payment via the user's credit or bank card, wherein the receiver/decoder is arranged to send debit instructions to the remote centre and to modify at least one of subscription right information and deciphering information stored on the users smart card in response to payment by means of the user's bank or credit card while both the first means and second means are simultaneously invoked.

The Examiner notes that while bank/credit cards with smart card functionality are known, the prior art particularly fails to teach separate first and second means which may be simultaneously invoked in order to modify subscription right information and deciphering information stored on the smart card.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
